

Transparent Public Procurement Rating

Lithuania

Public Procurement Legislation Assessment

The Assessment of the Public Procurement Legislation of Lithuania was prepared by Transparency International Lithuania in 2018.

Project is Financially Supported by the Open Society Institute Budapest Foundation (OSI)

The opinions expressed in this draft document belong to the Institute for Development of Freedom of Information (IDFI) and its partner organizations, and do not reflect the positions of Open Society Institute Budapest Foundation (OSI). Therefore, this organization is not responsible for the content of this report.

2016-2018

Introduction

The TPPR Methodology is envisioned to be a universal methodology for assessing public procurement legislations (PPLs) with the ultimate goal of identifying the strengths and weaknesses of legal frameworks and their enforcement around the globe.

Structure and Logic

The Methodology is composed of 64 indicators, each of which holds a similar degree of importance. A number of these indicators are further broken down into scoring components.

The Methodology covers all the major components of any public procurement system, from the nature of the legislation to the complaint review process, with focus on the transparency of public procurement systems.

The selection of indicators for the Methodology was largely based on international best practice, international standards and aspects of other existing methodologies in the sphere of public procurement, such as:

- EBRD Methodology and Standard
- GPA Standard (WTO)
- OECD Methodology and Principles
- EU Standard (**Directive 2014/24/EU**)
- Open Contracting Data Standard (OCDS)

Several indicators have been directly taken from one of the sources listed above as examples of best international practice. All of these indicators have been properly referenced.

During the indicator selection and elaboration process, an effort was made to ensure that the Methodology can be used to assess many different kinds of public procurement systems, but at the same time set high standards.

The indicators are separated into 5 groups (benchmark indicators) that represent the key characteristics (values) of a well-functioning, transparent and accountable public procurement system:

1. **Uniformity of the Legislative Framework** – 14 indicators
2. **Efficiency** – 10 indicators
3. **Transparency** – 18 indicators
4. **Accountability and Integrity** – 7 indicators
5. **Competitiveness and Impartiality** – 10 indicators

The methodology also includes 5 indicators that are used to assess legal components **that are not directly part** of the public procurement legislation but are crucial in terms of creating a transparent environment necessary for a proper functioning of any public procurement system. These indicators are grouped separately under '**Transparency Environment**'.

Indicators are also arranged according to the procurement process:

1. **Pre-tendering Phase** – procurement processes leading up to the publication of a notice of intended procurement.
2. **Tendering Phase** – procurement processes between publication of a notice of intended procurement and selection of a tender winner.
3. **Post-tendering Phase** – procurement processes after the selection of a tender winner.

These two arrangements allow for both process and value-based assessments of public procurement legislations.

Limitations

Public procurement systems vary significantly by country. The TPPR Methodology is intended to be applicable on a global scale, meaning that the indicators cannot be too specific and cannot cover all the possible variations and exceptions.

For the same reason, the TPPR Methodology can only be used to assess public procurement legislations on the national level, and it does not include indicators for any industry specific rules.

About the Project

The Methodology has been developed within the framework of the project [Transparent Public Procurement Rating \(TPPR\) – Assessing Public Procurement Legislation and the Enforcement Process in the Eurasian Region](#).

The project was funded by Open Society Institute Budapest Foundation (OSI) and has been implemented by a Georgia-based civil society organization [Institute for Development of Freedom of Information \(IDFI\)](#) together with 5 partner organizations from each country in the Eurasian region covered by the project:

Armenia – [Freedom of Information Center of Armenia](#)

Azerbaijan – [Transparency International \(TI\)](#)

Belarus – [BIPART](#)

Moldova – [Expert-Grup](#)

Ukraine – [Transparency International \(TI\)](#)

In its initial stage, the TPPR project only covers the Eastern Partnership (EaP) Region; however, it plans to scale the methodology up to larger regions in the future.

Scoring System

Each indicator included in the TPPR Methodology is granted equal weight and receives a maximum of 1 point. With a total of 64 indicators, public procurement legislations are rated on the scale of **0 to 64** (converted to percentages for easier understanding and visualization).

Indicators that are further broken down into scoring components are nevertheless worth 1 point. Each scoring component is evaluated separately.

The Methodology uses two ways to distribute points among scoring components of an indicator:

1. **'Scoring method'** is used when scoring components of an indicator overlap (meaning they do not add up as points) or have an unequal distribution of points.
2. **'Point distribution'** is used when each scoring component of an indicator is given an equal share of the overall point granted to that indicator.

This scoring system and the structure of the Methodology allow for the results to be presented in three ways:

1. **Country Overall Results and Rating** – country overall results on the scale of 0-64 are converted into and presented using percentages (0-100%). Countries are then ranked by their overall results.
2. **Results by Benchmark Indicators** – results for benchmark indicators are presented only through percentages, since benchmark indicators include an unequal number of indicators (and, therefore, unequal number of maximum points).
3. **Results by Procurement Process** – results for different phases of the procurement process are presented only through percentages, due to unequal number of indicators included in each phase.

Countries are also ranked and compared by their results for each benchmark indicator.

Visualization

Visualizing the results of the assessment is crucial to the goal of the methodology. For this purpose, the overall points received by each country shall be shown graphically using the scale of 0-100%, divided into 4 quarters of a specific color:

- Low compliance with TPPR Standards – 0% to 25% (red)

- Average compliance with TPPR Standards – 26% to 50% (orange)
- Good compliance with TPPR Standards – 51% to 75% (yellow)
- Excellent compliance with TPPR Standards – 76% to 100% (green)

Visualizations will also include spider graphs depicting country results by benchmark indicators and the procurement process, and multi-colored bar graphs for comparing country results in these categories.

Terminology

This methodology uses universally accepted procurement terminology as well as a few terms of its own design, in order to make key distinctions easier.

Acceptance act – A document signed by parties through which they agree on the terms by which a bargain is concluded.

Bid – Price offered by a tender participant during the bidding procedure.

Bid Security – A refundable amount of money paid by tender candidates validating their participation in a tender.

Coordination – Providing assistance to economic operators and procuring entities to engage in procuring activities.

Day – In the context of this methodology a day implies a calendar day.

Economic Operator – business or other organization which supplies goods, works or services.

Legal entity of public law (LEPL) (Public Legal Entity) – Organization created by the government or a government body, but separated from state management, and performing public authority independent of state control.

Machine-readable – A data format that can be processed (i.e. extract, transform and process) by a computer.

Monitoring – Data collection and analysis.

State non-commercial legal entity – A body governed by public law, having legal personality, not having an industrial or commercial character, and funded or managed, for the most part, by state entities.

Non-competitive procedure (direct procurement) – A type of public procurement procedure that does not involve prior publication of a notice of intended procurement.

Notice of intended procurement – A call for participation in an open tender issued by procuring entities.

Open tender – A type of tender, in which any economic operator can request participation.

Post-tendering phase – procurement processes after the selection of a tender winner.

Pre-tendering phase – procurement processes leading up to the publication of a notice of intended procurement.

Procurement regulatory body – a state body responsible for managing the public procurement system without necessarily incorporating lawmaking and law enforcement functions.

Procuring entity – A state budget and local government entity (including their respective LEPLs and state owned companies).

Public procurement annual plan – A document issued by procuring entities that contains information about all procurements planned within a fiscal year.

Tender – A type of public procurement procedure that involves bidding.

Tender application – An economic operator's official request to participate in a tender that includes all the documents requested by the procuring entity.

Tender candidate – An economic operator willing to participate in a tender.

Tender commission – A group of persons within a procuring entity responsible for conducting procurement (this function can also be performed by a single person).

Tender documentation – A collection of documents containing full information about the procurement, such as its subject-matter, technical requirements/specification, eligibility and evaluation criteria, draft contract conditions etc.

Tender participant – An economic operator that has been allowed to participate in a tender.

Tendering phase – procurement processes between publication of a notice of intended procurement and selection of a tender winner.
